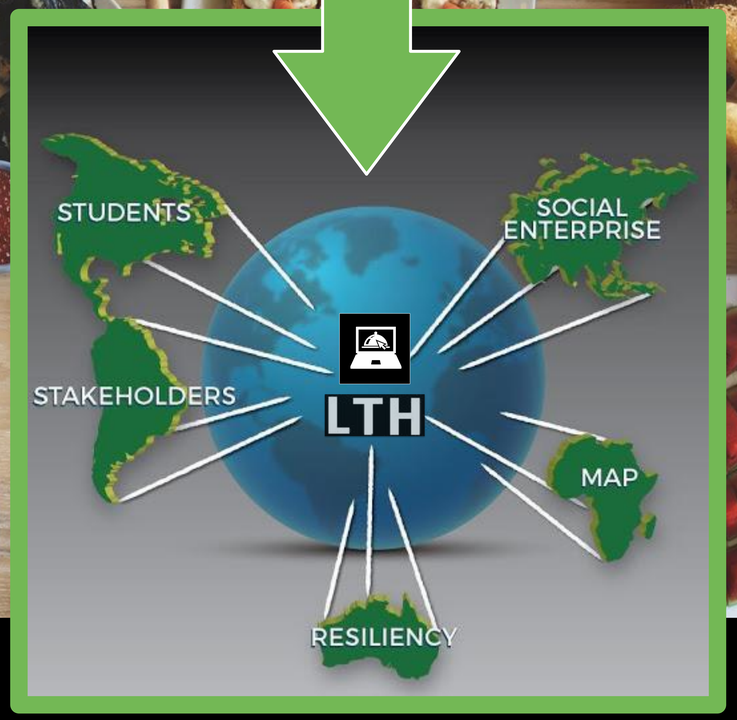
LITTLE TASTE OF HOME

PARTNER: Georgian

THEME: Resiliency

COHORT: Child & Youth Care



Digital and Customizable
Ethnic Food Delivery System

By connecting students with their diverse cultural food needs, through the use of an ethnic food wayfinding system, we can inspire success in their educational experience, by building and fostering their resilience through establishing their respective food identities within their communities.

By respecting the inherent value of diversity and the access to it, we begin to mitigate one component of the stigma surrounding Food Insecurity.
